Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	48789	Concern Info	I am writing in regards to a property in rural Andrew County MO. that has become a major nuisance over the years. The address is 19273 COUNTY ROAD 300, in Andrew County MO. The owner of the property over the years has turned the property into basically a junk yard. In addition he has a small pond on the property. He allows people to come to his proper and dump junk, burn casing off of wires and burn other trash and junk. They do most of this burning at the top of the pond. Then whenever there is a heavy rain or flood, the rain water washes all of the remnants of this junk out over the pond and across the neighbors pasture and eventually into a creek which I believe feeds into the Platte River. In addition all the oil and other by products from these junk vehicles and trash bleed into the ground and again I am sure make their way to a waterway. One of the people that come to the property dumps and stores tires there and on occasion I have seen the heavy black smoke that is evident of these junk tires being burned. Neighbors have watched this property go from bad to worse over the years. Is there anything that can be done to hold this owner accountable for the damage being done? Thank you in advance for your response.					
Comments	UF with response being sent along with a scrap tire hauler list							
KCRO	3/22/2022	3/16/2022	Unknown	Amsterdam Bates	Open Burning	CK		
Concern No.	48797	Concern Info	Individual is burning something that smells like plastics, very acrid. The complainant cannot be outside in the evening when this is going on. Suspects it is a nearby individual that has a scrap car & repair/rebuild business on his property.					
Comments	The open burning concern could not be verified.

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Concern No.</b> 48784 <b>Concern Info</b> Business is steam cleaning semi trucks without recovering polluted water. Business is painting semi trucks in and outside of buildings without proper paint booths and filtration releasing paint vapors into the environment								
<b>Comments</b> Kansas City Health Department, Air Quality Program								
KCRO	3/18/2022	3/17/2022	B Strait Detrail	Kansas City Jackson	Stormwater Contamination	OJ		
<b>Concern No.</b> 48785 <b>Concern Info</b> Business is steam cleaning semi trucks without recovering polluted water. Business is painting semi trucks in and outside of buildings without proper paint booths and filtration releasing vapors into the environment								
<b>Comments</b> This concern was referred to Kansas City MS4.								
KCRO	3/18/2022	3/18/2022	Dan Green	Lexington Lafayette	Open Burning	JS		
<b>Concern No.</b> 48799 <b>Concern Info</b> Adjacent property owners at 11687 Marshall School Road, Lexington Missouri, Lafayette County, continues to burn hazardous materials on a weekly basis, sometimes daily. We have previously notified the local fire department, but we are county limits, and so they do not have jurisdiction. I have reported them here last week for fires last week. Again, on 3.16.2022 burning was occurring on the property that smells of rubber and plastic. We observed what appeared to be an old refrigerator in the fire. This has been occurring regularly for the last 18 months we have resided next to them. Since February 2022, it has drastically increased to where we are concerned for our family's health and safety, and the local environment here.								
<b>Comments</b> No violations were observed during the investigation. A letter with a copy of the open burning regulation will be sent to Dan and Crystal Green.								

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between March 16, 2022 and April 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
KCRO	3/22/2022	3/21/2022	AA Quarry LLC	Kingsville Johnson	Fugitive Particulate Matter Stormwater Contamination	JS		

**Concern No.** 48940    **Concern Info** CP reporting that AA Quarry has excessive fugitive dust leaving the AA Quarry site, making it almost impossible to breathe the surrounding homes. CP also reported that the dust settles on AA highway from both quarry production and vehicles leaving the property and creates a driving hazard. CP says many neighbors have tried to speak with the owner to get the situation dealt with but he won't listen to any of them. They said that they have also tried to get this dealt with in the past but no one has been able to help (previous concern #31700 from 12/21/21 regarding same issue). I told CP that I am not sure what all we would be able to do about it but I would make sure it is given to the Air Pollution unit to look into for any possible solution.\*AA Quarry has a WP permit as well for storm water - MOG491291\*

**Comments** No violations were observed at the time of investigation, but increased monitoring of AA Quarry is recommended.

KCRO	3/29/2022	3/25/2022	Ray Miller	St. Joseph Buchanan	Open Burning Open Dumps Land Disturbance	CK		
------	-----------	-----------	------------	---------------------	--	----	--	--

**Concern No.** 48947    **Concern Info** RP's started renting the 10-acre property about one year ago. There was old trash and tires at the back of the property from the previous owners, which they started burning. They are continuing to burn this material. They seem to be randomly burning, but it's usually at night. They started clearing trees from the entire property and then started burning the trees also. After they cleared the land, they burned the house down on March 10, 2022. Neighbors called the volunteer fire department (South Central Buchanan County FD) but they watched the fire and did not attempt to suppress it. CP is unsure if there is a report from the FD. It is believed RP is living in a camper on the site. The land disturbance is causing runoff of sediments and increased runoff on neighboring properties. The mailbox at the site has a sign that says RM Construction.  
<https://rmconstructionmo.com/>

**Comments** Burning of the house appeared accidental. Information was provided to the owner and operator about open burning and managing construction and demolition waste.

### Concerns Investigated Between March 16, 2022 and April 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	48975	Concern Info	In the town of Conception Junction, Nodaway County at the section 8 apartments property location on the corner of 2nd street and Washington, I am concerned about repeated open burning of mattresses, upholstered furniture, remodeling debris such as carpet and foam backing and household trash (including food that I have seen loose dogs eating from the ashes . have seen their neighbor's two horses run away from the thick black smoke and I had huge ashes falling in my yard as we as have soot deposit on the siding of my house.They have had multiple open fires there since early December 2021 and a staging more items to burn there again. there is also a second area close by it where a tree that was cut down has been laid over other upholstered furniture, that location is on the property line of their neighbor to the east. the current open burn area is approximately 100 feet from T Hwy (2nd street) across from my residence 616 2nd street. I contacted the owner of the property after the first occurrence and he apologized saying he thought they had just burned construction debris. I let him know what was being burned and he said he would contact the people involved and let them know they should be more considerate of their neighbors. I called the sheriff once and a message said they would contact me but they didn't as I understand this may seem unimportant. I later contacted the county health department and they suggested I contact DNR. Many people in town have burning barrels for yard waste, myself included but what is burning in that open area across the street from my house is toxic smoke when the wind is in my direction, I get bad fire odor in my garage for sure and if I had an open window in the house, that would be a disaster. Can you help? I have videos of black smoke coming across to my house and video of two neighbor's horses running away from the smoke.					
Comments	A Letter of Warning has been issued to Tri-C Apartments LLC for open burning of prohibited items.							
KCRO	4/4/2022	3/31/2022	Hillyard Industries	St. Joseph Buchanan	Permitting	JH		
Concern No.	49324	Concern Info	Is this facility operating with the proper permits required by the state? I think other similar facilities are required to get permits for this type of business.					
Comments	The facility is in combined sewer area, and they are registered as HW generator and determined it do not need any Air permitting

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
KCRO	4/1/2022	4/1/2022	ZMDR Republic Foods	Lone Jack Johnson	Odor	JH		
<b>Concern No.</b> 49170 <b>Concern Info</b> Nw 800 Rd and NW 1941 rd Odor was bad around 8:30am								
<b>Comments</b> Since the concerned Party stated that the odor was not currently present, KCRO will try to do an investigation within the next two weeks (trying to choose a day with similar weather) to see if there is odor.								
KCRO	4/4/2022	4/4/2022	Jimmy Lee Wilson	Knob Noster Johnson	Open Burning	JS		
<b>Concern No.</b> 49258 <b>Concern Info</b> Neighbor is burning railroad ties on his property. He was burning them last night and is burning them again today. The Johnson County Fire Department and the Sheriff came out last night and made him put them out. Caller called the fire department again about the burning today and they told him to call the Department of Natural Resources.								
The neighbor has a whole pile of railroad ties. While the neighbor is retired he has a construction gig on the side, which is where he got the railroad ties. The caller also reports the neighbor goes to the salvage yard to get tires, takes off the rims, then takes the rims back to the salvage yard and burns the tires.								
Note, concern located in Montserrat, but mailing/Google address is Knob Noster.								
<b>Comments</b> A Letter of Unsatisfactory Findings has been issued to Jimmy Lee Wilson for open burning of railroad ties.								
KCRO	4/7/2022	4/6/2022	Jim Covey	Camden Ray	Open Burning	CK

**March 16, 2022 and April 15, 2022**

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Concern No. 49262</b> <b>Concern Info</b> Statement by Mark Sowder Fire Chief of the Richmond Fire Department-"Richmond Fire Department responded to a burnii house in Camden MO at 509 Ash Street on April 4, 2022. I asked the owners what had happened, and each stated that the had intentionally burned the structure to get rid of it. I asked if they had a DNR permit to do so, and they advised they did not.The first photo is the extent of the fire on our arrival. Due to the proximity of the fire to the creek, I decided to let the structure finish burning rather than putting run-off water from the fire into the creek."								
Chief Mark Sowder also provided photos and an incident report from when he responded to the house fire.								
<b>Comments</b> Jim Covey will be issued a Letter of Warning for the open burning of the old house at 509 Ash Street, Camden MO 64017.								
KCRO	4/12/2022	4/11/2022	Parks Cabinets	Clinton Henry	Permitting	JS		
<b>Concern No. 49304</b> <b>Concern Info</b> Is Parks Cabinets located at the industrial park in Clinton required to get an air permit? I didn't see one listed on the websit I'm concerned about all the VOC fumes from all the solvents and lacquers								
<b>Comments</b> Findings								
Parks Cabinet Shop, Inc. (Parks Cabinets) has built a new facility in Clinton and is in the process of moving the equipment from their Calhoun facility t this location. The facility has a variety of woodworking equipment, all of which is vented to a cyclone. Two new spray booths have been installed, and facility is thinking of moving a third from Calhoun to Clinton. No fugitive dust, visible emissions, or odors were noted from the facility during the investigation. Based on similar facilities, Parks Cabinets likely needs a construction permit for the spray booths. Air construction permit regulations we explained to Dan Dutton and Ryan Parks. See the report for complete details.								
Conclusions								
A Letter of Warning has been issued to Parks Cabinet Shop, Inc. for failure to determine if a construction permit was required for the new Clinton facili

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Concern No. 49310    Concern Info</b> Concerned party stated that Jim Hertzog of Hertzog Meat Co. is composting old cattle feed in such a manner that the entire town is overrun with foul odor. The odor can be smelled at the four way stop sign in town (the only one) and at the business location. CP wishes Jim would use some sort of odor control, such as lime, to reduce the odors or compost the old feed in different location on one of his other properties or at least a mile away from town. CP stated Jim owns multiple properties c 58 acres, 5 acres, and 50 acres so therefore he can place the compost elsewhere.								
<b>Comments</b> No excessive odors were detected during the investigation. The facility had some questions about the operation of their lagoon, and the facility was advised to contact Water Pollution permitting for assistance.								
NERO	3/18/2022	3/11/2022	Coast to Coast Demolition	Bethany Daviess	Asbestos	SB		
<b>Concern No. 49227    Concern Info</b> An anonymous letter received by the Air Pollution Control Program included a newspaper article that the Pilot Grove No. 1 Baptist Church was torn down recently by Coast to Coast Demolition of Bethany. No notification of demolition was done and possibly no inspection for asbestos.								
<b>Comments</b> No asbestos inspection was conducted and no notification of demolition was submitted to the APCP prior to demolition of this regulated structure. Require a notification to be submitted after the fact.								
NERO	3/18/2022	3/14/2022	Unknown	Moberly Randolph	Open Burning	DB		
<b>Concern No. 48782    Concern Info</b> Caller reports burning near apartment complex of elderly and disabled people. Every night someone or multiple people keep burning. This is a repeat concern, police previously found recreational wood fires ACE# 46864.								
<b>Comments</b> No specific location of the alleged burning was provided. Visited area, but was unable to locate.

### Concerns Investigated Between March 16, 2022 and April 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p><b>Concern No.</b> 49589    <b>Concern Info</b> There has been a very noxious odor coming from the area of TG Missouri for many months and seems to be getting strong. The odor is noticed at all times of the day. I have been told that is coming from their chrome plant which has been there for years and never produced odors like this constantly. Others in the community are commenting on this.</p> <p><b>Comments</b> I arrived in Perryville at 10:21 a.m. The weather was mostly sunny and ranged from 62 degrees Fahrenheit at the beginning of my odor surveillance to 68 degrees Fahrenheit when observations ended. The wind varied from blowing from the South-Southeast at 7 miles per hour when my observations began to from the South at 11 miles per hour when observations were ending. Likewise, the relative humidity range was 79% at the start to 65% at the end of observations.</p> <p>When I arrived at the intersection of Highway 51 and 61, it was 10:33 a.m. I turned on to Highway 61 and I drove to Walters Lane and then to Corporation Lane (10:36 a.m.) then back to Walters Lane (10:37 a.m.) and out to Highway 61 (10:38 a.m.) then to PCR 900 (10:40 a.m.) on to State Route V and then to State Route AC (10:41 a.m.) to near the intersection with Highway 51. Next, I turned and reversed course back along State Route AC to James M. Eddleman Welcome Center (at Welcome Center 10:48 to 10:52 a.m.). I then pulled on to State Route AC and I proceeded toward Highway 51 again turned around prior to Highway 51 (10:54 a.m.) and drove back along State Route AC to James M. Eddleman Welcome Center (at Welcome Center 10:58 a.m. to 11:02 a.m.). Next I got back on to State Route AC to Highway 51 (11:06 a.m.) and took Highway 51 toward and through the Perryville Industrial Park to Highway 61 (11:07 a.m.). I then drove on Highway 61 to Walters Lane (11:08 a.m.) to Corporation Lane (on Corporation Lane 11:09 to 11:13 a.m.). I then drove along Corporation Lane back to Walters Lane to Highway 61 (11:15 a.m.) to PCR 900 (11:17 a.m.) to State Route V to State Route AC (11:18 a.m.). I took State Route AC to James M. Eddleman Welcome Center (at Welcome Center 11:19 a.m. to 11:23 a.m.). I then drove back on to State Route AC (11:23 a.m.) toward Highway 51 and turned around on State Route AC (11:26 a.m.). I parked along State Route AC opposite TG Missouri and made observations (from 11:38 a.m. to 11:45 a.m.). I then drove along State Route AC to Highway 51 and I drove toward and through the Perryville Industrial Park again and finally I ceased observations and left the area at 11:48 a.m.</p> <p>Perryville Industrial Park odors noted during this surveillance were mostly very faint and included wood smoke, and a chemical odor. Mary Lee Gilster which is located across town from the Perryville Industrial Park area was also producing odors during the time I was conducting surveillance.</p> <p>I telephoned Dylan Carpenter, Senior Environmental Specialist with TG Missouri Corporation, on March 21, 2022, and he stated that no malfunctions have been reported to him that might have resulted in an odor environmental concern. He stated that a Nasal Ranger has been purchased by TG Missouri to evaluate odors as needed. TG Missouri is checking schematics now for the paint areas and checking into routine maintenance throughout their plant.</p>

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p><b>Concern No.</b> 49586    <b>Concern Info</b> The Concerned Party states a Tree Trimming business is open burning various tradewastes including cardboard boxes, untreated wood wastes, mirrors, etc. The smoke is too much and she is only 100 yards away.</p> <p><b>Comments</b> arrived at the location, where Mrs. Beaird had claimed Mr. Escobar had been burning for some time, at roughly 1:00 PM on March 21, 2022. I could see several burn piles from the road. Some of the burn piles were still smoldering as I drove past. I met with Wilda Beaird who lives near the lot where the burning was taking place. I introduced myself and gave Mrs. Beaird my credentials. I asked Mrs. Beaird if she could give me any additional information not mentioned in the concern report. Mrs. Beaird went on to describe how bad the smoke gets at times and how the burning is rarely supervised and often occurs throughout the night. Mrs. Beaird also stressed how close the burn piles were to surrounding homes. I brought a rangefinder with me to measure distances from Mrs. Beaird's home to the lot where the burning takes place. What I found was that the nearest burn piles were only 90-110 yards from Mrs. Beaird's home. The furthest corner of Mr. Escobar's lot was just outside of 200 yards from Mrs. Beaird's home. However, there were homes that were closer to Mr. Escobar's lot. Using Google Earth to create a 200 yard radius from the center of the home located at 61 Stanley Road, I found that the entirety of Mr. Escobar's lot was within that 200 yard radius, which is a violation of the open burning regulation. On the day of my investigation, the wind was blowing from the south to the north at roughly 10 mph. As I mentioned, there were a few burn piles on Mr. Escobar's lot that were still smoldering and there was nobody around supervising them. I called the New Madrid County Assessor's Office to see if Mr. Escobar owned any of the nearby homes and he did not. Mr. Escobar only owns the empty lot where the burning takes place. I called Mr. Escobar on Monday, March 28th around 2:00 PM to get some information from him and to ultimately inform him that the lot that he burns at on Stanley Road is too close to nearby homes and a violation of the open burning rule. I asked Mr. Escobar if he had any other property that was further away from homes where he may be able to burn at and he stated that he had no other available property to burn at. Before I got the chance to explain some other possible alternatives, Mr. Escobar told me that he would give my phone number to his lawyer and have her talk with me. I agreed to talk with Mr. Escobar's lawyer and reminded Mr. Escobar that he can call me if he ever had any questions or concerns. I received a call later that Monday, the 28th, from a Ms./Mrs. Elishia Baker who is the secretary to Mr. James M. McClellan. Mr. McClellan represents Mr. Escobar and works for McClellan Law Firm in Sikeston, MO. Ms./Mrs. Baker talked with me for a while on the phone regarding the burning that Mr. Escobar does and why he is unable to do it now. I explained to Ms./Mrs. Baker that Mr. Escobar's lot where he burns is too close to nearby homes which is a violation of 10 Code of State Regulations 10-6.045 Open Burning Requirements and that he will need to switch to another alternative way to dispose of his wood waste in a way that complies with the Open Burning Regulation. Ms./Mrs. Baker asked that I send her this open burning regulation in question so I agreed and emailed Ms./Mrs. Baker a copy of 10 Code of State Regulations 10-6.045 Open Burning Requirements. I have yet to hear from Mr. Escobar or anyone apart of the McClellan Law Firm regarding this issue. A Letter of Warning (dated April 7, 2022) was issued to Mr. Escobar requesting a compliance plan describing an alternative disposal method for his wood waste that will comply with 10 CSR 10-6.045.</p>

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
SERO	3/23/2022	3/23/2022	Robertson Dergo Funeral Home	West Plains Howell	Odor Opacity	JD		

**Concern No.** 49196    **Concern Info** SP:703

CP states the Robertson Dergo Funeral home crematory is releasing very thick black smoke everytime they run it. CP states the smoke fills the whole downtown area and the stentch from the smoke is very strong. Cp states the smoke and ash make it hard to breath.

**Comments** Robinson Drago Funeral Home had the brick replaced last summer in the crematory. During an investigation last fall the brick was check for cracks or breaks. No cracks or breaks were found. Discussed with Tim Cherry the current state of the brick. Tim Cherry stated the bricks are still free visible cracks or breaks. He stated he was using the crematory this morning for two cremations but neither cremation had any deviations or irregular activity occurred. He stated he did not visibly see any excess emissions from the crematory. We discussed during the next routine examination of the crematory he would have the manufacturerer check the stack and look for issues or buildup in the stack.

SERO	3/30/2022	3/25/2022	C & J Tree Service	New Madrid	Other	DB		
------	-----------	-----------	--------------------	------------	-------	----	--	--

**Concern No.** 49585    **Concern Info** CP states that RP is burning a large amount of trees and brush from their business. CP states they are doing this multiple times a week. CP states they are burning really close to dwellings.

**Comments** I arrived at the property where the burning has been taking place at roughly 12:30 PM on March 30, 2022. The temperature was 72 degrees with over skies, 21 mph wind from the south, and 63% humidity. Looking at photographs from the first time I visited this location on March 21, 2022, it looked as more wood waste had been brought to the lot, but there was a lot less being burned. In fact, I only observed a small trail of smoke coming from a pile the lot. The GPS coordinates for this property are 16S 0273711m E 4080066m N.

A Letter of Warning (dated April 7, 2022) was issued to the owner of this property, Mr. Carlos Escobar, due to him burning too close to occupied structures that he does not own. Mr. Escobar also is not supervising his fires at all times and allegedly burns overnight. All of these acts are in violation of 10 Code of State Regulations 10-6.045 Open Burning Requirements.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	49386	Concern Info	Good morning Chris Jimmy Cantrell here brief question for you sir I was reading through your DNR publications and stuff a there is a deal in there about asbestos that anytime an identity that's going to be commercial as in the front line addiction center is going to be. The requirements and standards for renovation demolition refurbishment is for an asbestos inspection and I was just wondering if you all had done that if Mr Russell had contacted you all to come and do an inspection on the property for asbestos through secondhand hear say over the weekend from a gentleman that knows the facility knows it's past said that the property had asbestos as in the building or buildings had a lot of asbestos in it due to the fact of when the original structure was built in the 50s and then everything had been added on to it through the years up until the end of the late 70s I was just wondering if that had been asked for or if by chance it'd had been overlooked. If you can answer this question if you can't I understand just say yes that I need to file a formal complaint or no that it's already been which will mean that it's already been looked at for that it is a concern we all know what asbestos is capable of doing and knowing that the former owner his style which was not good or isn't good he has very very many outstanding warrants for his arrest right now for fraud and Mr Russell just hasn't been the most straight up person on things in this whole entire deal since last October. If I need to make a formal complaint I will just let me know yes or no thanks have a great day. I must reiterate I am in no way shape or form against anyone receiving help and bettering themselves as long as it's done correctly.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Comments</b> I arrived at the address given, 24898 State Highway AB in Essex at approximately 1:15 PM. The property has a chainlink fence and gate that was padlocked when I arrived. I did not see anybody on the property nor did I see any vehicles. The place looked completely abandoned with the exception of one 12' enclosed trailer that looked fairly new. I could see no evidence of any renovation being done to this building from the entrance to the property. I called Mr. Tim Russell, the owner of this property, but did not receive an answer. I left Mr. Russell a voicemail and asked him to call me back as soon as he could. I received a call back from Mr. Russell on Wednesday, April 20. Mr. Russell informed me that the only renovation that had been done to the building was some new paint in spots, covering part of the ceiling with tin, and removing some stick on floor tile. Mr. Russell stated that several years ago, a flood had distorted the flooring and made the floor tile "buckle up" to the point where removing it was easy. Mr. Russell stated that the only repairs/renovation he had planned for the building was to replace some wiring, hook up the water, and lay down some new floor tile. Mr. Russell informed me that the floor tile that had been removed was still on site. I told Mr. Russell to leave the floor tile where it is and that he needed to get an asbestos inspection performed on the building as well as the already removed floor tile to determine if any asbestos is present. I offered Mr. Russell some common certified asbestos inspectors near the area and informed him that our website lists every certified asbestos building inspector that he may choose from. I gave Mr. Russell my phone number and encouraged him to contact me if he had any questions. Mr. Russell began renovations on a commercial structure without having an asbestos inspection performed on the building by a certified Missouri asbestos building inspector. I instructed Mr. Russell to have an asbestos inspection done on the building as well as the floor tile that was already removed to determine the presence of asbestos. I offered Mr. Russell some suggestions on local certified Missouri asbestos building inspectors and encouraged him to contact me with the results of the inspection as well as any questions he may have.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Concern No.</b> 49404 <b>Concern Info</b> CP states that the RP is remodeling the building they are currently in to make more room for inhabitants. CP states they do not believe they had an asbestos inspection before they began remodeling and it is a commercial building that is very old. CP states they are concerned there is asbestos in the building and there will be people living there. CP also states there was a horse trailer full of old material that was pulled away from the site a few days ago and little bits were flying off the trailer on the side of the road. CP is concerned for the inhabitants, workers and others in the community.								
<b>Comments</b> The conclusion to the original concern was that Mr. Tim Russell needed to have an asbestos inspection done on the building before he began renovating it. Mr. Russell needs to have the asbestos inspection done before any more work is done on the building as well as have the already removed floor tiles inspected for asbestos. Mr. Russell agreed that he will setup the inspection and have it performed before he does any more work on the building. I told Mr. Russell to contact me with any questions he has and to inform me of the results of the inspection so that I can point him in the right direction afterwards.

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between March 16, 2022 and April 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	49366	Concern Info	The anonymous complainant reported multiple concerns from the Prairie Valley Landfill located in Crawford County. The complainant referenced odor concerns, the facility not covering waste appropriately (prior to closing hours), and concerns of stormwater runoff to the local watershed. Additionally, odor concerns were reported on the adjacent Asphalt plant that are permeating the CP'S residence. The range of odors stretch out at least 1.5 miles according to the CP, apparently focused NW of the facilities.					
Comments	Inspection started around 11:50 a.m. on 04/19/2022. The weather conditions were as followed, clear skies, 50° temperature, 36% humidity and little to no wind blowing 1 mph to the WSW. I drove Oak Hill Road with runs along the southeast side of Prairie Valley Landfill and the Capital Material Asphalt plant at a speed around 15 mph as well as making multiple stops to gauge odor, no notable odors were detected. This road allows for the clearest view of the landfill without being on the property. This facility takes their own odor reading and reported normal operations and normal loads over recent weeks. On site there was a faint odor at times, but no odor was detected with the Nasal Ranger over the duration of the investigation. The facility reported normal cell activity and equipment have been operating as normal with no malfunctions or problems noted. Areas that have been used very recently and covered have not been seeded due to rain and soil conditions, the facility is planning on seeding as soon as possible. The contact for Prairie Valley Landfill is Steven Wherry. Capital Material Asphalt plant also located on Oak Hill Road officially began production for the year on the day the concern was reported. According to a plant operator reached over phone on 04/20/2022 Capital Material Asphalt produced 800 tons of regular hot mix. Started running again on Monday the 18th when the plant ran a couple hundred ton of hot mix and Tuesday the 19th when the facility produced a couple hundred tons of cold mix. I was informed the cold mix may give off a diesel-like odor. There were no odor violations noted at or around Capital Material Asphalt. No violations of Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.165 Restriction of Emission Of Odors were noted.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p><b>Concern No.</b> 49393    <b>Concern Info</b> Emitting steam into air with a new chemical that is obviously affecting wildlife as far as birds. Also, takes your breath away when you breath it yourself.</p> <p><b>Comments</b> I began my investigation at 1:45 p.m. The temperature at the beginning of my surveillance was 62 degrees Fahrenheit and the sky was cloudy. The wind was from the South Southeast at 20 miles per hour and the humidity was 49%. I drove in front of Mississippi Lime's property along US Highway 61 and then I turned on to Lime Kiln Road. I drove with windows partially rolled down to check emissions from Mississippi Lime Company but nothing was noted but a subtle smell of hot metal and equipment. I observed various types of birds in the area such as swallows, pigeons, European starlings, turkey vultures, a blue jay, a northern cardinal singing, red-winged black birds singing, meadow larks, and a gray squirrel. None of these animals were observed to behave in a way that would be unusual. I saw birds flying, heard birds singing, etc. I also looked for sick or dead animals; but I did not note any with the exception of a raccoon lying in the highway. I made two trips along Highway 61 and Lime Kiln Road. Additionally, I drove around the perimeter of Mississippi Lime's property on Highway 32 and Highway 61. I ended observations at approximately 2:45 p.m. The weather was reported to be mostly cloudy and 62 degrees Fahrenheit. The wind was from the South Southeast at 22 miles per hour and the humidity was 52%.</p> <p>I telephoned Jonathan Kennedy at Mississippi Lime Company on April 22, 2022. Mr. Kennedy stated that Mississippi Lime had spent about 115 years doing what they are doing now. He knows of no new chemicals that are being released. He also stated that there has been a problem with turkey vultures and black vultures at Mississippi Lime Company because they have become too numerous. Mississippi Lime has been working closely with the U.S. Fish and Wildlife Service to try to encourage the vultures to leave the property. Additionally, pigeons have also become a nuisance, since Mississippi Lime produces food grade lime in parts of the facility, animals can be unhygienic and are therefore unwanted.</p> <p>No violations noted.</p>

### Concerns Investigated Between March 16, 2022 and April 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Concern No.</b> 48922 <b>Concern Info</b> A caller reported a foul odor emanating from Merrell Bros., Inc. - St. Louis Disposal Solutions located at 6400 McKissock Ave, St. Louis, MO 63147. The caller first noticed the odor between 7:00 and 7:45 AM on March 16, 2022. The caller described the odor as a foul stench invading a warehouse located 1000 yards NE of the Merrill Bros. facility. The odor was described as similar to biohazard waste, fecal matter, farm animal, and human decomposition. The caller asked to remain anonymous.								
<b>Comments</b> The facility is a solid waste disposal operation. It receives materials including grease, sewage and septic waste. The grease enters by hose into one building. The sewage and septic waste are unloaded into a trough along the edge of the building which flows into another building. On March 17 I arrived at the site at 9:15 am. The temperature was 63 F, the wind at the time was between 3-5 mph blowing from the north. My location was south of the building across the street from Merrell. Between 9:21 am and 10:45 am when I left, six truckloads of material were offloaded. The trucks ranged from 1000 gallons to 10,000 gallons. I can not say if any or all of these trucks were filled to capacity. At one point, there were four trucks offloading at the same time, this occurred at 10:09 am. For the period I was on site, there was no opportunity to use the Nasal Ranger fully. For about 3 minutes on two occasions, I was able to use the Ranger between 60 and 15. At 15 in both cases, the odor was no longer detectable in the open air. In both cases, there was no detection at 60, 30 or 15. In all cases where the "foul" odor was detectable, it was followed by a disinfectant of some sort which eliminated the "foul" odor.

### Concerns Investigated Between March 16, 2022 and April 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p><b>Concern No.</b> 48918    <b>Concern Info</b> Holly Harris- Schott was the first to receive this concern on 03/17/2022. On 03/18/2022 Holly sent the concern to me as an open burning concern. "The concerned party (CP) called about two people throwing trash and burning said trash in a creek on the edge of a mobile home park property. The CP works at the mobile home park and received calls about the trash burning. The CP stated that there was "four (4) loads of trash in the creek bed" and the Responsible party (RP) was "burnii (3) feed from the water." The CP asked what the department could do about this situation and wanted the department to issue a fine to RP. I (Holly Harris- Schott) told the CP that we do not have the regulatory authority to do anything about the situation, but the department would take the concern and investigate. The CP gave me the name of RP, which was a man and his son (a minor)."</p> <p><b>Comments</b> 03/18/2022: received the concern Called the CP, Kathy Dunnah; owner of the mobile home park, Siesta Manor, that the RP is a tenant of and where the alleged actions took place She explained that the RP walked four trash cans down to the creek that is located on her company property and dumped the trash. Then the RP began burning the dumped trash. Many of the other residents and tenants called her to complain about the dumping and the burning of the trash due to the smoke and the smell. The area of burn/dump is located east of the mobile home park community playground that the CP also owns and maintains. When the CP confronted the RP, the RP allegedly admitted to the burning and explained that he had been doing this for quite some time. Since the CP does own the property, CP has posted signs that state a fine will be served to any persons or dump on the property. CP told the RP that CP will fine RP by up to 1,000\$. When asked how the RP responded to being caught, CP said that RP was not violent and did not escalate the situation. . Due to weather issues in the following week I will not be able to physically assess the property until ( 03/24-03/25). I referred the issue to Jeffco Code enforcement as well.</p> <p>On 03/24/2022 I visited the property along with Robert Andrews. We both were able to find a significant amount of trash dumping around the creek bed, and a burn pile next to the creek (see attached photo document) . However, we did not see any active open burning occurring. We were able to make contact with the alleged party, Mr. Bradford. Mr. Bradford was very understanding of the issues. He did state that he only burned paper products, due to missing the recycling service. I did explain to Mr. Bradford that since it is a mobile home park, open burning is not allowed of any kind. He explained he would try to do it off of the mobile home park's property, to which I responded he is not allowed to burn on property that he does not own. He stated he did not realize this was a regulation, and was understanding of why it was an issue. We were able to give him fact sheets, and information on how to properly dispose of residential waste.</p>

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p><b>Comments</b> On 3/21/22 I responded to the concerned party by e-mail:</p> <p>"Hi Michael,</p> <p>My name is David Ruby and I'm the air pollution supervisor for the Missouri Department of Natural Resources, St. Louis Regional Office. I just receive your concern regarding open burning practices and would like to get a little more information in order to assist you.</p> <p>Is the burning taking place within city limits? It looks like the address you gave us might be within O'Fallon city limits, but there surrounding properties that appear to be outside of city limits based on this map: <a href="https://gis5.ofallon.mo.us/pdfmaps/City_Limit_Map_8x11.pdf">https://gis5.ofallon.mo.us/pdfmaps/City_Limit_Map_8x11.pdf</a></p> <p>Is the burning within 200 yards of the nearest occupied structure that isn't owned by the individual burning?</p> <p>If yes to either of these, then the individuals burning must follow certain regulations – the burning must be supervised at all times, they can't burn at night, and they must notify their local fire department. Additionally, if burning within 200 yards from an occupied structure then they must use an air curtain incinerator and either obtain waivers from the nearby properties or approval from their local fire department.</p> <p>If no, then they can burn without these requirements as long as they are only burning untreated wood.</p> <p>In addition to everything above, they can't conduct burning that causes a public health hazard or a traffic hazard, as determined by the local fire department, police department, or health department.</p> <p>Here's a link to our latest fact sheet on open burning: Facts on Open Burning Under Missouri Regulations - PUB2047   Missouri Department of Natural Resources (mo.gov) I also attached a copy of the open burning regulations. I'm curious where you found the information that land clearing is not allow in the St. Louis area – this might be outdated information so I'd like to get that corrected. I know St. Louis County and St. Louis City have additional rules against burning yard waste, but I believe St. Charles County only prohibits burning trash.</p> <p>Please let me know if you have any questions and I look forward to hearing back from you."</p> <p>On 3/21/22 the concerned party responded:</p>

			<p>"David,</p> <p>Thank you for reaching out. The property in question is partially within the city limits of O'Fallon, but part of it is in unincorporated St. Charles County, and they are locating the burn pile outside of the city limits so O'Fallon is refusing deal with the issue. The location the entire property and the location that they are burning is well within the 200 yard limit of occupied buildings, see attached map showing the location of the property and burn pile and its distance to the next closest occupied structure (about 250ft to the house across the street).</p> <p>Please also see attached fact sheet that I came across with highlighted areas that I based my information on.</p> <p>Sincerely,</p> <p>Michael Lubiewski"</p> <p>I responded the same day:</p> <p>"Michael,</p> <p>Thank you for clarifying. We can certainly investigate this concern and if this falls under the category of a 'commercial land clearing operation' then we can enforce the 200 yard rule. Do you happen to know if he is clearing the trees for development purposes? Does he plan on building something in thi area? If you don't know, that's okay; we'll try to find out in our investigation. If he's just clearing trees as part of regular property maintenance, then unfortunately this would fall out of that category and the 200 yard rule wouldn't apply. All we would be able to do is make sure he's not burning anythir other than untreated wood waste and supply him with information. (see SharePoint for full report)</p>

<p><b>Concern No.</b> 48919    <b>Concern Info</b> Caller reported that their neighbor was burning something that was giving off a strong, chemical/plastic odor. Says that this not the first time this has happened. They do not know what is being burned. Said that they usually burn at night, and that the fire department put out the fire earlier.</p> <p><b>Comments</b> I explained that residents in Lincoln County could burn small amounts of regularly generated household waste, however due to the odor it sounded like they were burning something durable/plastic. I told Dan that we would send them a letter and fact sheets as a first step and then take elevated action they continue to burn. Dan gave me the number of his other neighbor, Jeanie Ogelsby (636-462-6226), who lives right next door to the individuals burning. I called Jeanie and explained the same thing. Jeanie said this has been going on for a long time. I confirmed the name and address of the homeowner and explained that we would send a letter, and that she should report future instances of burning to us and the fire department.</p>

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Concern No.</b> 49150 <b>Concern Info</b> Concern came in through the National Response Center: "Environmental Emergency Response received an NRC report that states: "CALLER REPORTED SOME TYPE OF UNKNOWN CHEMICAL IN THE ATMOSPHERE THAT IS CAUSING DISCOMFORT." The source of the chemical odor is unknown. This incident is being referred to the St. Louis Regional Office for follow-up."								
<b>Comments</b> I arrived at 17 Flint Ridge Drive around 12 pm. The area is mainly large spread out houses. The closest facility is General Motors, which is roughly 3 miles away. However, there are many houses in between these two points and there has been no further reports indicated that the odor is being generated from General Motors.  Upon arrival, I did not notice any smell. I drove throughout the rather large neighborhood and never smelled any odor. I used a nasal ranger on the neighborhood road, a few houses away from the given address. I did not find a violation on any of the dilutions. At the time of the investigation, a violation of 10 CSR 10-6.165 "Restriction of Emission of Odors" was not found.								
SLRO	4/4/2022	3/30/2022	Unknown	St. Charles	Odor	HH		
<b>Concern No.</b> 49151 <b>Concern Info</b> EPA Online Form: "Area around I-70 and hwy 79 in St. Peters MO has been experiencing an odor issue that is causing some physical distress to some residents in the area. It is described as a chemical smell and causes a dry chalky sensation when it is noticed. From the information that she provided it seems to occur at night most of the time, but I am seeking clarification on that."								
<b>Comments</b> On 4/4/2022 @ 10:15 AM, I went Highway 79/70 north to the adjacent property at Krey Distribution company parking lot and did not smell any chemical odor, I drove down on Highway 79 south to Days Inn parking and I did not notice any chalky sensation.

### Concerns Investigated Between March 16, 2022 and April 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	49235	Concern Info	The caller states: I would like to report that my neighbor has been burning toxic things in his yard that are creating a very horrible and noxious odor. This neighbor does not have trash pick up and routinely burns trash. The odor that I am reporting is different from a burning trash odor it is very noxious and toxic. One of my neighbors is a respiratory therapist and he suspects that the material is some type of chemical or plastic. All of my neighbors have to close their windows each time this has happened because the smell is so bad. This neighbor happens to be burning the material at 08:52 AM on March 3 2022 and the odor is awful. The last time they burned the material was on March 15, 2022. On March 25, 2022I called the county and they came out and investigated. I am not sure what they discussed with my neighbor but they informed me tha they would be conducting a follow up.					
Comments	Myron: Searched site of property on Google maps (see attached) for driving directions and to determine if indications of open burning exist in aerial photo.  Miranda: 3/30/22 - Looking on parcel viewer it appears the property is in Jefferson County not Franklin but it is close to the boarder. - Called Joann Highfill and got the number of the county service that was called. Joan also gave me the following information:  o The road to the residence is a private drive shared by the neighbors of the street. She can see what he burns through the trees from her property mentioned seeing Styrofoam and garbage. o He burns generally before it is about to rain. o This has been going on for years o She has tried to talk to him about it o All the neighbors have expressed concern for the problem. After a google search of the number (636) 797-5555 it is the Jefferson County Court House. Figured this was probably sent to the division of solid waste so I called (636) 797 5036. I talked to Admin and said the investigator's name is Garry and he would not be available till Monday 4/4/22. Admin said th he would probably just tell me the same things she did which was that he went out to the address 3/16/22.  4/4/22 I called Garry and left a voicemail

SLRO	4/12/2022	4/12/2022	Unknown	Warren	Odor Hazardous Air Pollutant Release	DR		
<b>Concern No.</b> 49346 <b>Concern Info</b> Online concern submittal: "My property over last 2 years is now to a point of some chemical smell and is now causing concern for my family and I, we are having skin, eye irritations, sickness and health issues this includes my dog, no matter where you go are touch on my land you can smell it, I emg need it checked out as I have neighbors that also can smell it"								
<b>Comments</b> I called the concerned party on 4/12/22. I left a message explaining that we would need information about where the odors were coming from, and that there did not appear to be any regulated facilities near her property. I received a call back shortly after. Kimberly explained that the chemicals were being sprayed maliciously on her property from her son's ex-girlfriend and her friends, usually in the middle of the night. She said that she believes they have been harassing her and trying to scare her and her son into moving. She had contacted the police multiple times about this. She was worried about the chemicals they were spraying for her own health and safety, and for the health of the environment. She was hoping that we could collect air samples to analyze what chemicals were being sprayed. I told her that unfortunately we did not have the capability to collect samples, and that she should contact the Warren County health department, as they may be able to help her. I also explained that since the alleged source of the chemicals/odors is trespassing and applying chemicals illegally and maliciously, that she would need to continue calling the police. I explained that we would log her concern and apologized that there was not more that we could do, but that we only regulated odors being released from businesses. Kimberly understood and thanked me for my time and information.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	49476	Concern Info	04/12/2022					
			"1290 Sand Run Road Troy MO 63379 is the registered address of the company even though at this address is a rented residence house. The RP brings in all kinds of solid waste may be from cleaning sites and burn them at this property. He said the county and the city were not able to help him. This has been going on for a while. Local Fire Department comes to put fire out as needed. The open burning takes place at night only. The last time they did open burning was a month ago. "-LZ					
			Concerned Party (CP) initially had spoke with Lemma Zewdie on 04/12/2022 and stated that the alleged party (AP) had be bringing construction materials from his business to his residence. The CP stated that the AP had done this before, and aft the AP moved all the materials from his primary place of business that the AP would then burn the construction materials and leave the fire unattended. The CP stated that AP does have his residence listed as a place of business as well. However when looking in Missouri Parcel Viewer the address is only listed as residential. On 04/12/2022 Lemma stated to the CP that since the AP had not conducted open burning yet, that the department of natural resources cannot take any action yet.					
			On 04/13/2022 the CP contacted the Air pollution control at SLRO again, and stated that the AP had conducted open burning the night before. The CP stated that the AP did burn the previously hauled in construction materials. The CP stated that the AP does leave the fires unattended as well, and only seems to burn at night. The CP has contacted the department in the past about this address and there is a concern form from 05/13/2021 about dumping and illegal open burning that was conducted at this address. The CP also stated they have contacted the Lincoln County Fire Department in the past about this address and the fire department has responded.

<b>Concern No.</b> 48814 <b>Concern Info</b> 2445 kk highway Pineville Missouri. Resident does commercial business hauling, storing and burning furniture, appliances, carpet, cabinets, and all kinds of other things which he burns in a huge fire every 2 to 3 weeks causing toxic smoke to drift over our street which is pleasant view lane Pineville. Every day a double axled trailer can be seen full of all kinds trash and from demolition from homes. The area can been seen on Google Earth but the burn area is 3 times larger now and junk pil is way bigger. This affects our elderly neighbors who cannot go outside due to toxic smoke that smells largely like plastic burning. The smoke is terrible and we are also concerned how run off from this toxic burn may affect our wells and drinking water. We are also in the water shed area of the elk river which this may affect. This has a huge affect in our way of life an the beauty of the area and could have huge impact on our health and ground water

Concern No.	48805	Concern Info	Voicemail received Sunday at 7:30am: Dagley reported the odor is very bad at Rangle & 32nd. Bassett called Dagely on 3/21/22 for additional details: Dagley left a voicemail with SWRO on 3/20/2022 to report an odor concern. Bassett returned her call on 3/21/2022. Dagley believes the odor is from Jasper Products. The odor was the strongest between 7 and 8 AM on Sunday morning. Dagley reported they have been reporting odor concerns from this fact for 6 or 7 years, and although it is somewhat better now, it is still a major nuisance.

Concern No.	48933	Concern Info	Marci Swope called to report a large unattended burn pile within 200 yards of her home in Miller County located at 48 Wedgewood Road Eldon, MO 65026. She stated that roughly 2 years ago, the parcel directly to the north of hers was purchased by the owner of Lake Area Signature Homes, LLC. He previously had burned significant construction material a was investigated by DNR. In the last two days, he has been bringing in 20+ dump truck loads full of trees/rootballs/vegetation, NOT construction material, and is burning it in a large pile an estimated 150 feet from her house She is concerned with the activity taking place so close to her house and the potential for it to spread. Marci stated that she saw him leave the active burn pile unattended.  Marci stated she will contact her local fire department for her immediate safety concerns, and would like a follow-up from DNR regarding the legality of the activity.

**Concern No.** 49218 **Concern Info** CP submitted photographs, email stated Nuisance/Solid Waste - I am inquiring about solid waste/trash/nuisance issues. Camden County has been dealing with a property owner, Jody Camarillo, for a few years now. They have been ordered to clean up the property. Now, they have vacated the property but left a mess behind. A lot of the junk has been burned and they may continue to burn it to get rid of it. (see attached pictures). Is there any department within your organization that handles this type of stuff? No drinking water or septic issues, just trash and burning furniture, steel, etc.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	49360	Concern Info	***ONLINE CONCERN*** We live in Meadow Ridge subdivision and there is a property in the middle of our subdivision that some zoning reason isn't a part of our subdivision. They have a commercial/agricultural business where they bring in dump trucks full of unidentified material, burn some, stop some and not sure what happens with the rest of it. Concerned about if they are burying hazardous material. Then, yesterday, April 11, we noticed an RV they have parked there. They ran a generator all night. Noise pollution and now a concern for what is happening with the sewer water? Any water run off. Our subdivision has its own sewer system and water as well.... Not sure how they are disposing of water or now they are even getting water?  **The Concern was submitted twice by the same person with some varying detail. See second entry below**  There is a commercial business in the middle of our subdivision. Not clear on what the business is but the owner has dump trucks full of unidentifiable items/materials brought in, through the residential subdivision and dumped in his property. The amount and frequency vary as well as the timing. Trucks come very early in the morning, sometimes after dark. Now he has a motorhome on the property. We are concerned that he could be bringing in hazardous material and burying it? Like a landfill?
